Art Unit: 3662

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1, drawn to a GPS receiver device, classified in class 342, subclass 357.09.
 - II. Claims 2-5, drawn to a method of providing a position fix, classified in class 342, subclass 357.01.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II are related as subcombinations disclosed as usable together in a Single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such a GPS receiver device, while invention II has separate utility such as a method of providing a position fix.
3. Because these inventions are distinct for the reasons given above and the search required for group I is not required for group II, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 3662

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
